Portfolio

EDUCATION

St. Andrews Institute of Technology and Management (SAITM)

2022 – 2026

Bachelor of Technology in Computer Science and Engineering (AI & ML)

CGPA: 8.0

EXPERIENCE

Zanze Company

Jan 2026 – Mar 2026

AI Engineer Intern

Remote

- Architected and deployed an **AI-powered Chatbot** using **LangChain** and **OpenAI GPT API**, enabling intelligent, context-aware conversational responses for real-world enterprise business queries.
- Engineered a **Retrieval-Augmented Generation (RAG)** pipeline with **FAISS vector store** and semantic embeddings, improving response accuracy by grounding chatbot answers in company-specific knowledge bases.
- Integrated the chatbot into a production-ready **Streamlit** web application, delivering a seamless user experience with multi-turn conversational memory and context-aware reply generation.

PROJECTS

AI-Powered Social Media Automation Platform | *MongoDB, Express.js, React.js, Node.js, JWT* Source Code

- Architected and developed a full-stack **AI-powered Social Media Automation Platform** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js), enabling users to automate content creation and scheduling across multiple social platforms.
- Integrated **OpenAI GPT API** for AI-driven post generation, caption writing, and hashtag recommendations, reducing manual content creation effort with intelligent, context-aware suggestions.
- Implemented secure **JWT-based authentication**, RESTful APIs, and a responsive **React.js** dashboard with real-time post scheduling, analytics tracking, and platform management features.

Chat With PDF – Generative AI Document Assistant | *LangChain, API, FAISS, RAG, Streamlit* Source Code

- Built an intelligent **Generative AI document assistant** using LLMs, LangChain, and OpenAI API to deliver precise, context-aware question answering over user-uploaded PDF documents.
- Implemented a full **RAG pipeline** with PDF chunking (PyPDF2), **FAISS vector database**, and semantic embeddings for accurate and efficient information retrieval at scale.
- Designed an interactive **Streamlit** front-end with multi-turn conversational memory, enabling real-time document Q&A with significantly improved response accuracy and seamless user experience.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, SQL

Frontend Web Development: HTML5, CSS3, GraphQL, React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, MySQL, AWS

Tools & Platforms: Git, GitHub, Docker, VS Code, NPM, Postman, Vercel, Netlify, Cloudflare, CodeRabbit

Generative AI & Automation: LLMs, NLP, RAG, LangChain, LangChain Community, Vector DB, AI Agents, Gemini API

Languages: English, Hindi

ACHIEVEMENTS

- Solved **200+ coding challenges** on LeetCode, CodeForces, and CodeChef platforms.
- Secured **2nd Rank** in College Science Exhibition.

CERTIFICATIONS

- Data Science, Machine Learning, DL, NLP Bootcamp** – Udemy (2025)
- Full Stack Generative and Agentic AI with Python** – Udemy (2025)
- Data Science Course** – PW Skills (2024)
- AI Learning** – IBM Skillbuild (2023)
- UI/UX Design** – Udemy (2022)
